## About our symbol

As Europeans we are fighting politicians who seek to ban the swastika, the question of the return to port our old symbol with the swastika in center was asked to our Beloved Prophet. He replied:

"Asia except for which the question does not arise, is to decide Raelians what symbol they want to wear, but of course we always encourage the true symbol with the true swastika! "

Dear Raelians, so it's up to you to decide if the symbol you want wear. ☺

## About internet broadcasting

Here are some details of our Beloved Prophet

All members of the structure that do not distribute leaflets in the street can now do so comfortably at home on the Internet using chat rooms, forums etc ... because people feel less overwhelmed when they receive information through the Internet than when given in the street, partly because when they are connected to the net because they want to interact with other people, which is not necessarily the case for people on the street where everyone has fear of being abused, invaded and mess around with intruders.

When they connect to the net, their mindset is totally different: they are receptive because they feel free and protected by the fact that there is no contact direct physical and they think that the screen protect them as a "screen", while in Indeed, it connects to the world and helps to ensure that every thing they look penetrated their mind.

So the Raelians who did not like intruders in the brains of people can now be very excited to spread the messages on the net and provide the download free messages to other people ... even hostile! Fear being rejected by people in the street disappears for broadcasters because they are also protected by the screen of any negative reaction and any judgments ... and also, Again, the best way to respond to hostile people is to tell them: download messages, it's free, and then you can judge for yourself at Rather than repeating the media rumors and prejudices ... "
